END-USER OPERATIONAL GUIDE

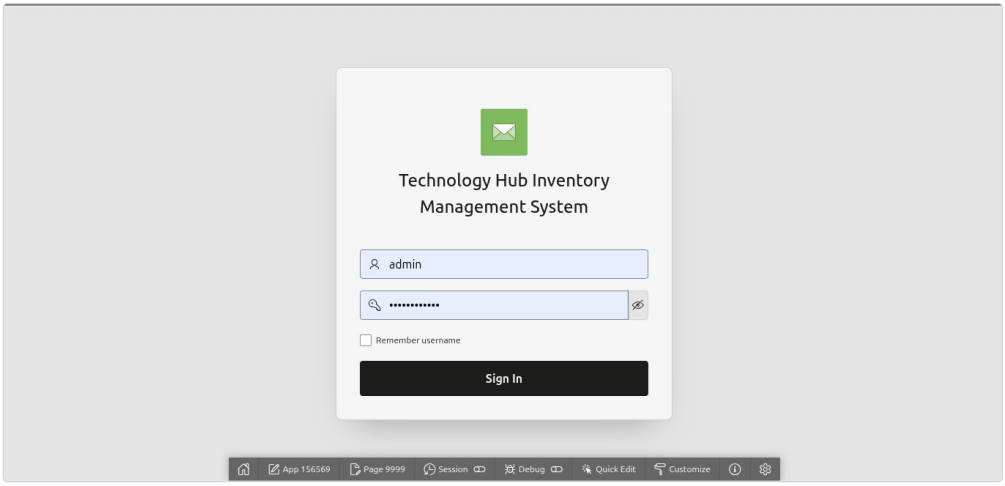

Technology Hub Inventory Management System

Welcome to the Technology Hub Inventory Management System. This guide explains how to navigate the application, manage inventory, process sales, and generate operational reports.

1. GETTING STARTED

Logging In

1. Navigate to the application URL in your web browser.
2. Enter your assigned **Username** (or Email) and **Password**.
3. Click **Sign In**.

Navigation

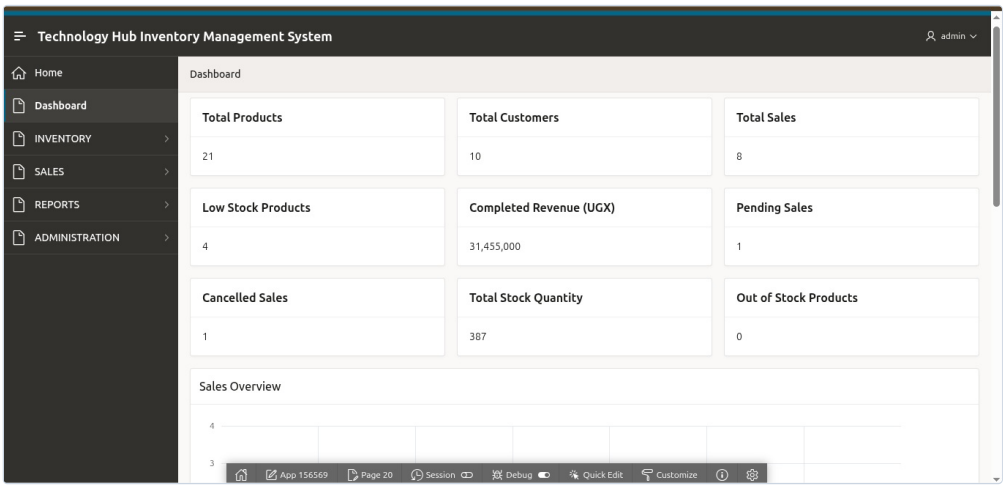

The left-hand sidebar menu provides full access to all system modules:

- **Home:** Return to the primary landing page.
- **Dashboard:** View real-time high-level business metrics and key indicators.
- **INVENTORY:** Manage Products, Suppliers, Categories, and Inventory Transactions.
- **SALES:** Manage Sales headers, line items, and Customer directories.
- **REPORTS:** Access Low Stock, Inventory Valuation, and Sales history reports.
- **ADMINISTRATION:** Manage App Users and inspect system Audit Logs (Admin only).

2. THE DASHBOARD (PAGE 20)

The Dashboard provides a real-time visual summary of core business metrics:

- **KPI Cards:** Displays Total Products, Total Customers, Total Sales, Low Stock Products, Completed Revenue (UGX), Pending Sales, Cancelled Sales, Total Stock Quantity, and Out of Stock Products.
- **Sales Overview Chart:** A bar chart visualizing the volume and distribution of sales over time.
- **Low Stock Products:** A quick-reference table displaying critical stock items requiring immediate reordering.

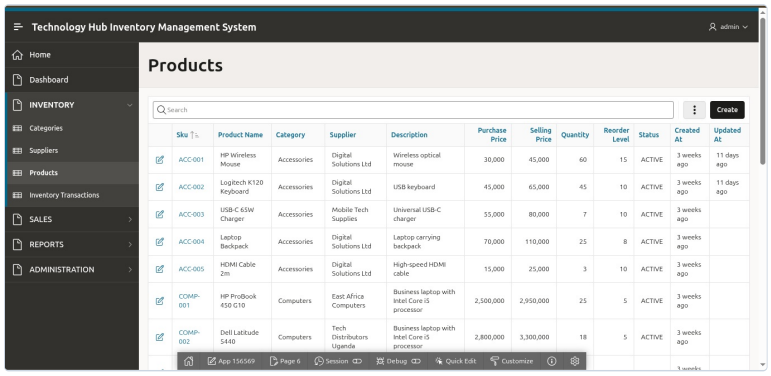

3. MANAGING INVENTORY (PAGES 6, 14, 15)

Note: Inventory modules require Manager or Admin privileges.

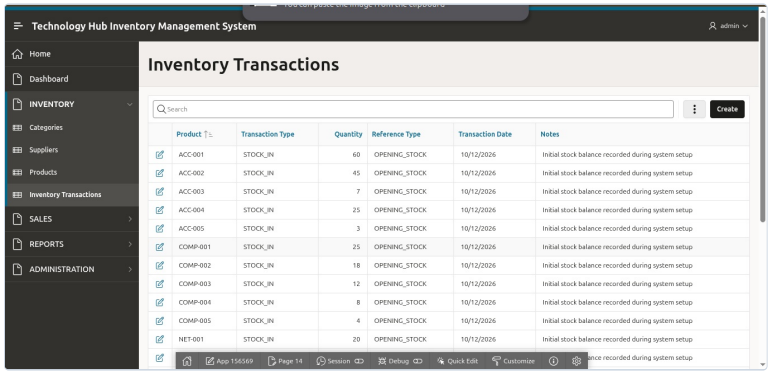

Managing Products

1. Click **INVENTORY > Products**.
2. To add a new item, click the **Create** button.
3. Fill in required fields: `SKU` (must be unique), `Product Name`, `Category`, `Supplier`, `Purchase Price`, `Selling Price`, `Quantity`, and `Reorder Level`.
4. Click **Create** to save.
5. To edit an existing item, click the pencil (**Edit**) icon next to the record.

Recording Stock Transactions

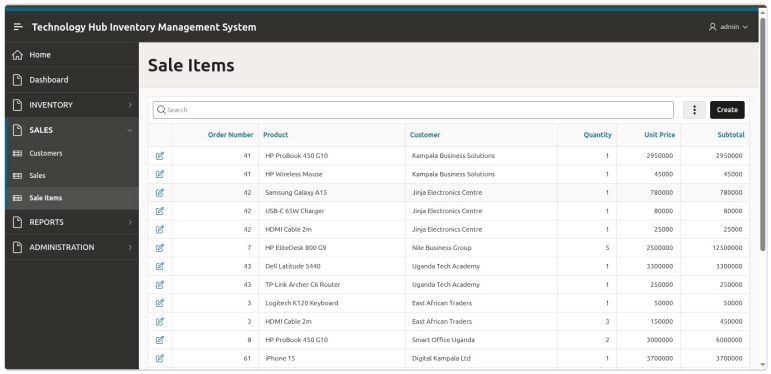

1. Navigate to **INVENTORY > Inventory Transactions**.
2. Click **Create**.
3. Select the `Product`, `Transaction Type` (`STOCK_IN`, `STOCK_OUT`, `ADJUSTMENT`), `Quantity`, and `Reference Type`.
4. Click **Create** (This automatically adjusts the main Product Quantity on submit).

4. MANAGING SALES & CUSTOMERS (PAGES 8, 10, 12)

Processing a Sale

1. Navigate to **SALES > Sales** and click **Create**. Select Customer, Status (`Pending`, `Completed`, `Cancelled`), and Payment Method.
2. Navigate to **SALES > Sale Items** to add line items to the order.
3. Select Sale (Order Number), Product, Quantity, and Unit Price. Click **Create** (This automatically deducts product inventory and updates total sale amount).

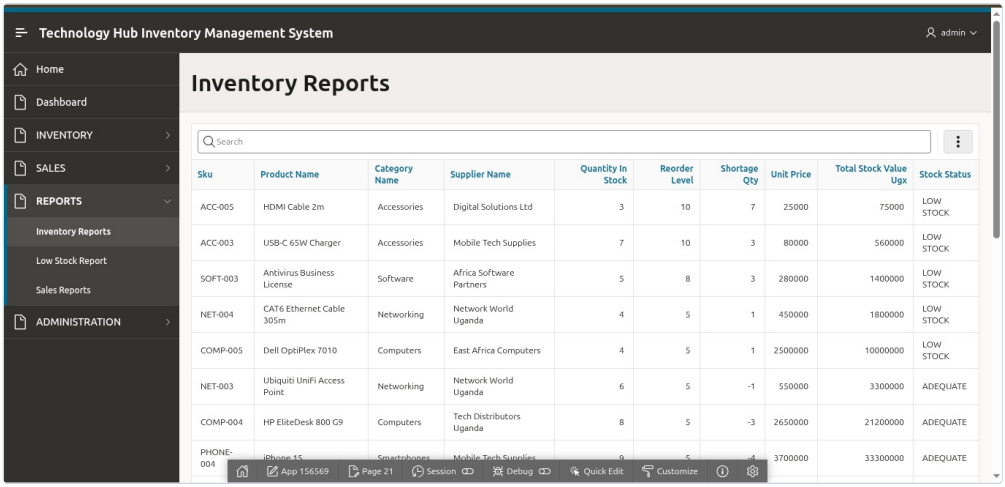

Printing a Receipt

1. Navigate to **SALES > Sales**.
2. Locate the order and click the link in the **Status** column.
3. On the Customer Receipt page, click the **Print Receipt** button.

5. REPORTS (PAGES 21, 23, 25)

Note: Reports require Manager or Admin privileges.

- **Inventory Reports (Page 21):** Complete listing of products, current stock levels, total valuation (UGX), and status (`ADEQUATE` vs `LOW STOCK`).
- **Low Stock Report (Page 23):** Filtered view showing items where current Quantity is less than or equal to Reorder Level.
- **Sales Reports (Page 25):** Complete history of sales including Order Number, Customer, Date, Total Items, and Order Total.

6. ADMINISTRATION (PAGES 16, 18)

Note: Administration modules require Admin privileges.

Managing App Users

1. Navigate to **ADMINISTRATION > App Users** and click **Create**.
2. Enter Username, Full Name, Email, Password, assign a Role (`Administrator`, `Inventory Manager`, or `Sales Staff`), set Status to `ACTIVE`, and click **Create**.

Viewing the Audit Log

Navigate to **ADMINISTRATION > Audit Log** to inspect user login events and record mutations. Use the search bar to filter by Username or Table Name.
